

# Why not GO and bring our half-day *Smart Science Seminar*® to your church and community?

**Drew Crandall has spoken across the Northeast over 2,000 times. Please consider booking him for your upcoming event.**

This 3-hour, 3-session seminar is a great way to encourage and equip local Christ-followers (teens, men and women) and challenge skeptics on a Saturday morning or afternoon.

## Session #1: Introduction to Smart Science

We begin the seminar by examining foundations of scientific thought, and distinctions between observational and historical science. The reality is, it's smart to acknowledge that the universe shouts with evidence of intelligent design by an intelligent Creator.

## Session #2: Smart Science: DNA & Dinosaurs

Talk about smart! We look under the microscope and explore the mind-blowing world of DNA and nanotechnology. Since most people in today's culture "love" dinosaurs, we examine scientific and Biblical insights on where these beasts came from, and how they disappeared from the earth.

## Session #3: Smart Science: Earth's Age & the Flood

Contrary to popular belief, scientific evidence and the Biblical record do not point to evolution over millions of years, but to a dramatically younger earth. At the conclusion, attendees will be inspired and equipped to have a consistently Biblical worldview!

**Smart Science Seminars** are priced based upon the number of participants, necessary travel and lodging. To explore the possibilities further, please complete the form below:

NAME / TITLE: \_\_\_\_\_

ORGANIZATION: \_\_\_\_\_

CITY / STATE: \_\_\_\_\_

PHONE: \_\_\_\_\_ EMAIL: \_\_\_\_\_

Approximate size of group: \_\_\_\_\_

Preferred time of year:  Spring  Summer  Fall  Winter  No preference

I'm not interested in hosting a seminar, but I am interested in having Drew speak about creation science.
